

VOLUNTARY REMEDIATION PROGRAM DEPARTMENT OF ENVIRONMENTAL MANAGEMENT

PROJECT SUMMARY

Site name: Former Wake-Up #6390

Applicant Name: Speedway SuperAmerica LLC

Site location: 1428 East 62nd Street

Indianapolis, Marion County, IN

VRP Site No.: 6971204

Project Manager: Bill Wieringa

Date received: December 9, 1997

Date completed: August 7, 2002

Contaminant(s): BTEX and MTBE

Media addressed: Surface Soil, Subsurface Soil and Groundwater

Cleanup Objectives Achieved: VRP 1996 Guidance Tier II Nonresidential

Deed/Land use restrictions: The property shall not be used for residential purposes.

Project Summary: This site entered into the VRP to address issues related to the operation of a gas station at the site from 1967 to 1992. Once the gas station closed, the site then removed the station's USTs and upon review of closure samples taken, further investigation was deemed necessary. During 1993 to 1994, active bioremediation was performed at the site in the former west tank cavity and in injection ports downgradient from the west tank cavity. Site consultants and VRP staff conducted soil sampling and four quarters of groundwater sampling at this site and concluded that the site contamination was less than the Tier II Nonresidential CUGs on-site and less than the Tier II Residential CUGs off-site for all the constituents of concern. VRP staff formally approved the Completion Report for this site on August 7, 2002.
